

**Request for Crystal Structure Determination
(Coppens Laboratory)**

Person requesting the determination _____

Advisor _____

Empirical formula of the compound _____

Method used to grow crystals (specify solvent if applicable) _____

Molecular diagram:

Purpose of the structure determination:

Please mark one of the following:

1. The structure is a major part of the publication that is intended. The GA who perform the structure determination will be a co-author.
2. The GA should submit the structure to Cambridge Structural Database as only pictorial information will be in the publication.

Please note:

1. There is a charge of \$400/per structure, which will be billed through Ms. Sandy L. Fairchild.
2. For absolute structure determination the presence of at least second-row atoms in a molecule is required.
3. CIF file with the complete structure information will be given to the person requesting structure determination when the paper is being submitted for publication.

Signature of Advisor _____ date _____
